

About Dr. Jan Goetz

Dr. Goetz is a quantum physicist, Co-CEO, and Co-founder of IQM Quantum Computers.

Goetz did his doctorate on superconducting quantum circuits at TU Munich and worked as a Marie-Curie Fellow in Helsinki at Aalto University, where he holds the title of docent. In 2018, Dr. Goetz spun out IQM from Aalto University and VTT Technical Research Center of Finland together with his co-Founders and raised over 200M€ of capital for the company.

In 2024, WirtschaftsWoche Magazin selected him as one of 30 executives to shape Germany, in 2023, he was selected as Founder of the Year by Handelsblatt. In 2020, Capital magazine selected him as one of 40 under 40 in Germany and he received an entrepreneurship award from the KAUTE Foundation.

Goetz was in the Board of the European Innovation Council EIC where he now serves as an EIC ambassador, and he holds a Board seat in the European Quantum Industry Consortium QuIC.

He is also a member of the German Federal Economic Senate, an EIC Scaling Club Council member, member of the Hall of Future, as well as a Digital Leader and Global Innovator at the World Economic Forum (WEF).
