

About
**Dr. Mikko
Välimäki**

Dr. Välimäki is a Co-CEO of IQM Quantum Computers.

He has founded and led several technology companies and held board member positions in both startups and publicly listed companies. He was IQM's Chairman after founding and served on the Board until joining the management as Co-CEO to scale the business.

In the past Välimäki led storage software company Tuxera Inc. as founding CEO to over hundred people and high-margin sales across Europe, Asia and North America. The company became the worldwide leader in file systems and storage software for consumer and industrial electronics applications.

He has a PhD in software business from Aalto University and a master's degree in law from the University of Helsinki.
